Summary

Goal-oriented Computer Science graduate seeking a challenging role to apply strong planning, organizational, and technical skills. Adept at managing tasks efficiently while maintaining high energy and ownership in fast-paced environments.

Education

B.Tech in Computer Science & Engineering (2021-2025)

Sharda University

Technical Skills

- **AI / ML:** Python, NumPy, Pandas, TensorFlow, PyTorch, Keras, Matplotlib
- **Computational Chemistry:** GROMACS, XGrace, CHARMM36, Avogadro
- **Web Development:** React, HTML, CSS, JavaScript
- **Languages:** Python, Java, SQL, Bash
- **Tools:** GitHub, Tableau, VS Code, IntelliJ, Jira, Microsoft tools, Jupyter Notebook

Experience

Web Developer Intern

Bharat Intern

May 2023 – June 2023

- Developed and deployed three independent web applications using HTML, CSS, and JavaScript.
- Published projects as separate GitHub repositories with live deployments.
- Projects included a portfolio website, Netflix homepage clone, and a temperature converter web app.

Projects

Self-Driving Car Simulation Web Dashboard

Python, CARLA Simulator, WebGL, Three.js, HTML, CSS, JavaScript

- Built an interactive AI-driven dashboard to visualize and learn autonomous vehicle simulations.
- Implemented a novel terrain self-adaptation method for autonomous vehicles.
- Research outcome led to a government-certified patent.

Pharmacokinetics, Molecular Docking & Dynamic Simulation

Python, Bash, GROMACS, XGrace, Matplotlib

- Worked on protein-ligand complex simulations in collaboration with Delhi University researchers.
- Handled scripting, simulation execution, and post-simulation analysis.

Spam Email Detection Using Machine Learning

Python, TensorFlow, Jupyter Notebook, NumPy, Pandas, Matplotlib, Seaborn, NLTK, WordCloud

- Designed and trained a supervised machine learning model in Jupyter Notebook to classify emails as spam or legitimate using a labeled mixed-email dataset.
- Implemented text preprocessing and feature extraction using NLP techniques (tokenization, stop-word removal, vectorization).
- Achieved **97.3% classification accuracy** in spam detection through model optimization and evaluation.

Achievements & Awards

- Research Paper: “Self-Driving Car Simulation Using Machine Learning” presented at **ICDMIS 2025**; accepted for publication in **Springer** (forthcoming).
- Indian Government Certified Patent: *Terrain Adaptive System for Autonomous Vehicles*
Patent No: 202511017309

Workshops & Certifications

- Java Foundation Certificate – Oracle
- Web Development Certification – Udemy

Interests

Basketball, Photography
